

## High Business Awards during Tristone's Exhibition at the IAA 2015 Motorshow in Frankfurt/Germany

Tristone Flowtech was exhibiting at the 2015 IAA Motor Show in Frankfurt; between September 15<sup>th</sup> and 18<sup>th</sup>.

As one of the market leaders in Europe, Tristone has successfully expanded its customer support network and operations into the NAFTA region & China and is now looking to India and further global locations.

Several OEMs had the opportunity to visit the Tristone stand and discuss about the product offering and its technological advantages. Members from the complete Tristone Group were supporting the constant customer's visits from early in the morning, to late in the evening, in an effort to inform the exhibition attendees about the Tristone product portfolio.

OEMs and Tier 1 suppliers were the main attendees to the show, highlighting some important meetings in the Tristone stand with customers such as GM, Audi, Porsche and Mobis among others, which took also the opportunity to learn intensively about the Tristone products, with special focus on the technical solutions for the electric powered vehicles.

All TRISTONE products arouse a big expectation, with more specific questions relating to surge tank development capabilities, air charge and air intake applications and fiber cooling hose technology.

During two of these visits, Tristone was confirmed as future supplier for the water cooling pipes for the hybrid version of two future carlines, as well as for the ones assembled in the traditional combustion engine.

The Tristone participants included key persons from the Sales and Engineering Departments, who worked with customers, in an effort to grow the Tristone brand in the global markets.

“Overall the event was a further step for the Tristone Group to build a network of relationships and to show a global presence through the largest motor show in the world, in addition to the ongoing business activities”, said Ignacio Salazar, VP Sales & Marketing.

---

Tristone Flowtech Group, is highly specialized on fluid applications in the area of engine and battery cooling as well as aircharge and air intake systems and is more and more benefiting from the trend towards reduction of space and fuel consumption with the introduction of polyamid materials as well as the introduction of new Powertrain concepts with hybrid and electrical cars and the integration of fluid motor and battery cooling systems.

Frankfurt/ Germany: TRISTONE Flowtech Group has reached 2014 an annual turnover of 195 M€ with 2.400 employees, and is one of the leading automotive supplier groups worldwide for fluid applications in the area of engine cooling, battery cooling as well as turbochargers with manufacturing and development locations in Germany, Poland, Czech Republic, Slovakia, Turkey, Spain, France, Italy, Mexico and China.

The Group was established based on a spin-off of the former Fluid Automotive Business Unit of Trelleborg AB in July 2010 and is supplying to the automotive customers Renault, Nissan, PSA, Fiat/Chrysler, Ford, Volvo, General Motors, VW Group, Suzuki, BMW, Daimler, Bosch as well as further Tier One suppliers.
