

New Energy vehicle show in Hong Kong

TRISTONE was exhibitor in Hong Kong new energy vehicle show on the 2-3-4 of April 2014.

It was the opportunity for our Company to show our battery cooling portfolio during 3 days, highlighting our knowledge in weight and cost reduction by presenting a comparison between metal, rubber and plastic solution, combined with our HEV Twin Surge Tank solution.

Renault, FAW and BYD were exhibitors and several General Managers of the Electric Departments were very interested in TRISTONE technical solutions, including the Twin Surge Tank.

Toyota confirmed their decision to develop together with FAW new hybrid platforms in China to reduce the cost of hybrid cars on the Chinese market. The aim of this new development is to reduce the current gap and to benefit from the Chinese Government plans on low emission cars.
