

New Delhi: Tristone Flowtech Group participated in AUTO EXPO COMPONENTS –2016 from 4th Feb 2016 to 7th Feb 2016.

This event is India's biggest event in terms of its scale and response from not only the local Indian Manufactures but also for the manufacturing companies across the world.

With India being seen as one of the most important markets of the world with growing economic GDP and strong buying power consistently becoming stronger day by day, Tristone Flowtech Group perceives huge potential in this market and strongly believes in launching its footprint in the Indian Market.

Tristone Flowtech Group has got enormous response from OEM's present in India and have welcomes TFT's position in coming to the Indian Market. Senior Leaders from OEM's like Mahindra & Mahindra, Maruti Suzuki, GM, Volkswagen India, JLR, Renault-Nissan visited Tristone Flowtech Group booth and have been keen to understand companies strategy for Indian footprint.

Tristone had primarily showcased two of its important product lines:

- Engine Cooling Hoses
- Surge Tanks

Both the product lines received good response from OEM's, especially Surge Tanks is a huge market for country like India where manufactures of pressurised surge tanks are very few.

Currently Tristone Flowtech Group has a Sales Office in Pune, India and is in the process of tapping the local market with business development and promotional activities.

The Group is planning to set-up the production plant in western part of India in Pune Industrial zone and intends to be operational by end of 2017. The plant is at the moment under construction.
