Sourcing of Minerals Policy

Page 1 of 2

Tristone Flowtech's responsible mineral program encapsulates tantalum, tin, tungsten, and gold (also known as "3TG") which are mined in the Democratic Republic of Congo (DRC) or adjoining countries as defined by US legislation and additionally cobalt and mica as they have been originated from high-risk areas.

Tristone Flowtech follows sourcing standards of Responsible Minerals Initiative (RMI) throughout own supply chain, expects all suppliers to implement a system to trace requirements of the Conflict Minerals Reporting and the Extended Minerals Reporting of the Responsible Minerals Initiative according to the latest RMI's Conflict Minerals Reporting Template (CMRT) and Extended Minerals Reporting Template (EMRT) in order to ensure conflict free products.

Tristone Flowtech is committed to sourcing components and materials from companies that share our values around human rights, ethics and environmental responsibility according to Supplier Code of Conduct.

As a part of our commitment to corporate social responsibility, Tristone Flowtech is committed to the responsible sourcing of minerals.

Sourcing is done in an ethical and sustainable manner that safeguards the human rights of everyone in our global supply chain and preserves the environment.

Any connection between the materials used in Tristone Flowtech products and human rights abuses, bribery, ethics violations, negatively impact the environment are unacceptable.
