### **Tristone Supplier communication – B2B-/Web-Portal “OTOEDI” / “Classic” EDI**

Dear Valued Supplier

Some time ago we have informed you through several channels that we need to improve and simplify our cooperation and communication with you.

Most of you receive our orders (Forecasts and final demands) electronically (EDI) already. Likewise we need to receive your dispatch advises (ASN/DESADV) in future. Those who do not have an electronic data exchange will also have this opportunity in future.

For this reason we request that you – **latest by April 24, 2025** – inform us of your preferred method of electronic data interchange (EDI) communication so that we may align our processes accordingly and ensure seamless integration in line with automotive industry standards. Please consider that in case you would like to choose direct EDI with Tristone that we are working as “OFTP” EDI protocol”. If you’re unable to receive or provide this for you only option 1. will be the possible option.

Please follow this link – <https://forms.office.com/e/xaqBG2QgdN> – where you can choose your most preferred way of communication:

1. Tristone B2B/Supplier Web-Portal “OTOEDI”
2. “Classic” EDI
3. “Classic” EDI – already existing with Tristone (only receiving Forecasts)

Once you made your choice you’re going to be contacted by our IT team with detailed information about the next steps.

With best regards  
Tristone Flowtech Group

Christian Matzanke  
Global Logistics Director

Gian Franco Buscemi  
Vice President Purchasing
